

ABDELKADER ANMIRA

Data Engineer & BI Developer

anmiraabdelkader@gmail.com | +212 651 191 581 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | AI Hoceima / Marrakech, Morocco

Results-driven Data Engineer & BI Developer experienced in ETL/ELT pipelines, real-time monitoring, and Power BI dashboards. Skilled at turning complex data into actionable insights using Microsoft BI and modern data technologies. Seeking a PFA internship to contribute to impactful data-driven projects.

TECHNICAL SKILLS

Languages: Python (Pandas, PySpark, Scikit-learn), SQL, Java(springboot), Bash

BI & Monitoring: Power BI (DAX, Power Query, DirectQuery), Power Automate, Real-time Dashboards, KPI Alerting

Data Engineering: Apache Spark, Kafka, Airflow, dbt, DataBricks, Microsoft stack (SSIS, SSAS, SSMS), ETL/ELT Pipelines Data Warehousing(snowflake...), Star/Snowflake Schema

Databases: PostgreSQL, SQL Server, MySQL, MongoDB, OracleDB

DevOps / Infra: Docker, Docker Compose, Git, GitHub Actions, MLflow, FastAPI, Streamlit, Grafana

EDUCATION

National School of Applied Sciences AI Hoceima (ENSAH)

2022 – 2027

Engineering Degree | Distributed Data Systems · MLOps · Cloud Data Infrastructure · Product-Grade BI Solutions

EXPERIENCE

Menara Holding – Digital Innovation, Morocco

Jul 2025 – Aug 2025

Data & AI Engineer Intern

- Built a computer vision attendance pipeline (OpenCV, YOLO, DeepFace) with MySQL, automating HR reporting and reducing manual work
- Developed a LangChain + FastAPI Text-to-SQL assistant, enabling HR teams to query personnel data in natural language.

KEY PROJECTS

TaaSim — Big Data Transport Automation Platform – *Kafka · Spark · MinIO · Kappa Architecture · ETL · ML · Flink · Cassandra · Grafana · Docker*

GitHub → https://github.com/abdoNM5/Taasim_Data_engineering | Portfolio → <https://abdonm5.github.io>

- Co-designed a Kappa architecture for real-time and batch processing, replaying 1.7M+ Casablanca and 30M NYC TLC taxi trips using Kafka.
- Built 3 Apache Flink streaming jobs with ~1.2s matching latency and ~12s automatic recovery with zero data loss.
- Containerized a JWT-secured FastAPI service with Docker and built Grafana dashboards for real-time KPI monitoring and reporting.
- Contributed to a MinIO (S3) data lake, Cassandra serving layer, and PySpark ETL pipelines enriched with H3 geospatial indexing and weather data.

Realtime E-Commerce Data Pipeline– *Kafka · Airflow · Snowflake · dbt · Docker · Power BI · DAX · Star Schema · Python*

GitHub → <https://github.com/abdoNM5/realtime-ecommerce-pipeline> | Portfolio → <https://abdonm5.github.io/projects>

- Built a production-grade, end-to-end streaming pipeline ingesting live e-commerce events (users, products, orders) from a REST API into Snowflake using Apache Kafka, Airflow DAGs, and a resilient Python consumer with upsert (MERGE INTO) logic.
- Engineered a dbt transformation layer on Snowflake implementing a Star Schema
- Designed an interactive Power BI dashboard with 4 KPI cards, a VIP customer leaderboard with live avatars, retention funnel, and Pareto scatter plot — powered by 12+ custom DAX measures including churn detection, revenue per user, and category affinity.

SBA Forensic Risk & ROI – Executive BI Dashboard – *PySpark · Power BI · DAX · Star Schema*

GitHub → <https://github.com/abdoNM5/USBA-BANKING> | Portfolio → <https://abdonm5.github.io/projects>

- Analyzed 27M+ SBA loans (\$112B) with PySpark; engineered a star-schema ETL enabling drill-down KPI analysis at portfolio, lender, and sector level. Built advanced DAX measures (SUMX, SWITCH, CALCULATE) to isolate \$13B in systemic losses; delivered a multi-page executive Power BI dashboard with hierarchy drill-downs

Data Talent Intelligence Platform – *Power BI · Power Query · DAX · Star Schema · NLP · FastAPI · Airflow · Postgres*

GitHub → <https://github.com/abdoNM5/Job-Intelligence> | Portfolio → <https://abdonm5.github.io/projects>

- Built an end-to-end data job intelligence platform, aggregating and normalizing postings from multiple sources using Airflow, Docker, and PostgreSQL.
- Developed an NLP-powered recommendation engine with FastAPI, delivering personalized job recommendations through skill extraction and embeddings.
- Designed a star schema data warehouse and interactive Power BI dashboards to monitor recruitment trends, marketplace KPIs, and ingestion performance.
