Oracle Cloud Infrastructure 2025 Certified Developer Professional

Issued by [Oracle](#)

An Oracle Cloud Infrastructure (OCI) Developer 2025 Professional exam is intended for individuals seeking mastery in cloud-native application development. Our OCI Developer Professional course is tailored precisely for such aspirants, empowering cloud developers and architects with the skills to leverage OCI Developer services effectively. Dive into microservices, containerization, and OCI's serverless offerings, mastering essential testing strategies and security measures along the way. By the course's end, you'll be primed to conquer the Oracle Cloud Infrastructure Developer Professional Certification, equipped with insights into observability services for fine-tuning performance and troubleshooting. Embark on this transformative journey and unlock your full potential in cloud-native innovation.

Expiration Date: April 13, 2028

Skills

Developing and deploying scalable and secure cloud native applications on OCI

Leveraging Serverless Technologies for Cloud Native Development

Testing and Securing Cloud Native Applications

Monitoring & Troubleshooting Cloud Native Applications
